GALLON  
(3.8 LITER)

## FLOWZONE®

# STORM™ ZERO-DRIP™ SWAPTANK™ HANDHELD SPRAYER (1-GAL)

MODEL #: FZVA00

The all-new handheld Storm™ 1-Gallon battery sprayer allows for precision, low-flow, drip-free spraying! Plus, you can easily switch between chemicals on-the-go with the detachable SwapTank™ and quickly adjust spray patterns with the 4-in-1 brass nozzle.

### Why Switch to Battery-Powered Spraying?

- Maintain consistent pressure and spray patterns to apply chemicals evenly. More control, less waste!
- Cover more area in less time without stopping to pump, increasing productivity and lowering the cost per spray application.
- Focus on spraying, not on pumping! More convenient and efficient.
- Reduced fatigue and more comfortable spraying for technicians.
- Take advantage of the low-flow capability and target small areas with precision aim.

### 4-in-1 Brass Nozzle

Switch on-the-fly between a low-flow **0° pin stream** (0.06 gpm), standard **0° pin stream** (0.11 gpm), **80° fan** (0.11 gpm), & **50° fan** (0.13 gpm).

### SwapTank™ Technology

Bring extra, prefilled tanks on-site to increase spray capacity. Plus, quickly **switch between chemicals**.\*

### Zero-Drip™ Stainless-Steel Wand

Never worry about dripping chemicals with a precision-engineered dripless wand. Holster the wand on the tank lid or the side of the tank body.

\*It is recommended to use a tank with a cleaning solution to purge chemicals in the pump, hose, and wand between chemical swaps.

GALLON  
(7.6 LITER)

## FLOWZONE®

# STORM™ DRIPLESS SWAPTANK™ BACKPACK SPRAYER (2-GAL)

MODEL #: FZVAQP

The all-new backpack Storm™ 2-Gallon battery sprayer allows for both high and low output capability. Applicators can spray anywhere between 0.05 to 1.1 gallons per minute with any nozzle tip. Ideal for any high-output spray application as well as spot / precision spray jobs.

### Why Switch to Battery-Powered Spraying?

- Maintain consistent pressure and spray patterns to apply chemicals evenly. More control, less waste!
- Cover more area in less time without stopping to pump, increasing productivity and lowering the cost per spray application.
- Focus on spraying, not on pumping! More convenient and efficient.
- Reduced fatigue and more comfortable spraying for technicians.
- Take advantage of the low-flow capability and target small areas with precision aim.

new!  
Ergonomic inline  
spray handle

### 3 Quick-Connect Nozzles

Easily switch between a **0° pin-stream** nozzle, **45° fan** nozzle, or an **adjustable brass cone** nozzle.

### SwapTank™ Technology

Bring extra, prefilled tanks on-site to increase spray capacity. Plus, quickly **switch between chemicals**.\*

### Low to High-Flow Capability

New pump technology **NOW** allows for both flow restrictive and high output nozzles, ranging from 0.05 to 1.1 GPM.

\*It is recommended to use a tank with a cleaning solution to purge chemicals in the pump, hose, and wand between chemical swaps.
